

Preliminary Agenda: Beam Energy Meeting in Zeuthen, 6-8 June 2007

- Filimon Gournaris: - Requirements on beam energy precision from physics
- Viktor Duginov: - Proposal – Dubna site for the ILC

End Station A activities

- Mike Woods: - Test run in summer 2007
- What about in 2008 and later on ?
- The post IP beam energy measurement, T475
- Stewart Boogert: - Status report on the T474 (talk prepared by Bino M.)
- Sergey Kostromin - Magnets in T474

Dubna activities

- Nikolay Morozov: - Magnetic field measurement bench commissioning and tests
- Viktor Duginov: - Temperature control of magnets

E_beam measurement using synchrotron radiation

- Roman Makarov (Boris Zalikhanov): - Status of detector activities
- Roman Makarov: - GEANT4 simulation – status
- Karlheinz Hiller: - Sim. update of the SR experiment, first results

Laser resonance absorption to measure E_beam

- Robert Melikian: - The possibility of precise E_beam measurement ...
- update of the method
- Arsen Ghalumyan: - Some aspects of its realization (laser / detector)

Compton backscattering for E_beam measurements

- Nickolai Muchnoi: - talk LCWS 07 (update) / Experiment (at Novosibirsk) ?
- Michele Viti: - talk LCWS 07 (update) / Studies on photon detection

General Aspects

- all: what to do in 2007/ 08/ 09 ? next steps ➔ EDR (2010)
- next meeting: London; second half of November (?)
- anything else ?
