Lectures:
Light-Cone Expansion in Quantum Chromodynamics

Johannes Blümlein,
DESY
23.1. – 27.1. 2006

Contents:

1. Introduction
2. The Parton Model
3. Light-Cone Expansion
4. Twist-Decomposition of Composite Operators
5. Current Algebra on the Light-Cone and Sum Rules
6. Twist-2 and 3 Contributions to Spin-dependent Structure Functions
7. Target Mass Corrections
8. The Non-Forward Compton Amplitude
9. Non-Forward Anomalous Dimensions
